

Face Rejuvenation

Mrs PB, 59 years young, appeared sad and older than what she felt. Despite having non-surgical facial-rejuvenation procedures, her neckline and jowls continued to drop considerably. After visiting a number of other doctors in London, she decided to fly to Australia and have a brow, middle face and neck lift. The after photos are three weeks after surgery with no makeup and identical lighting. Keyhole surgery was used to elevate her brow giving her eyes a brighter look. The middle face is fuller and contoured to accentuate her cheeks. The muscles in the neck have been tightened, making her neckline and jawline defined. Overall she appears elegant, refreshed and natural looking.

Please note: Images are raw photos. They have not been airbrushed or retouched in any way.
